RUSTCLEEN

Rust Remover

Introduction

Extremely effective and most competitively priced .These are formulated specially to remove thickest layers of Rust very quickly & efficiently.

Rustclean is very usefull & effective for removing rust from small parts and components. Rustclean is very usefull & effective for removing rust from large parts which can not be dipped.

Description :

Brown Colour Liquid suitable for removing rust by brush application

Physical properties:

Specific gravity: 1-4, slightly acidic behavior

Method of application:

Stir the material thoroughly till uniform consistency is obtained. Apply Rustclean with a brush & allow it to dry for 15 minutes .The surface will achieve its original black colour & become blackish.

After treatment wash the substrate with water to neutralize the residual acidity and then wash with water.

Coverage:-

15-20 sq. Mtr In one Ltr

Precaution:

Rustclean is acidic in nature and hence protect the skin/eyes while applying it's splashes may be removed completely with jet of clean water
